Instalação e Atualização do
Quantum GIS
Versão 1.5 "Tethys"

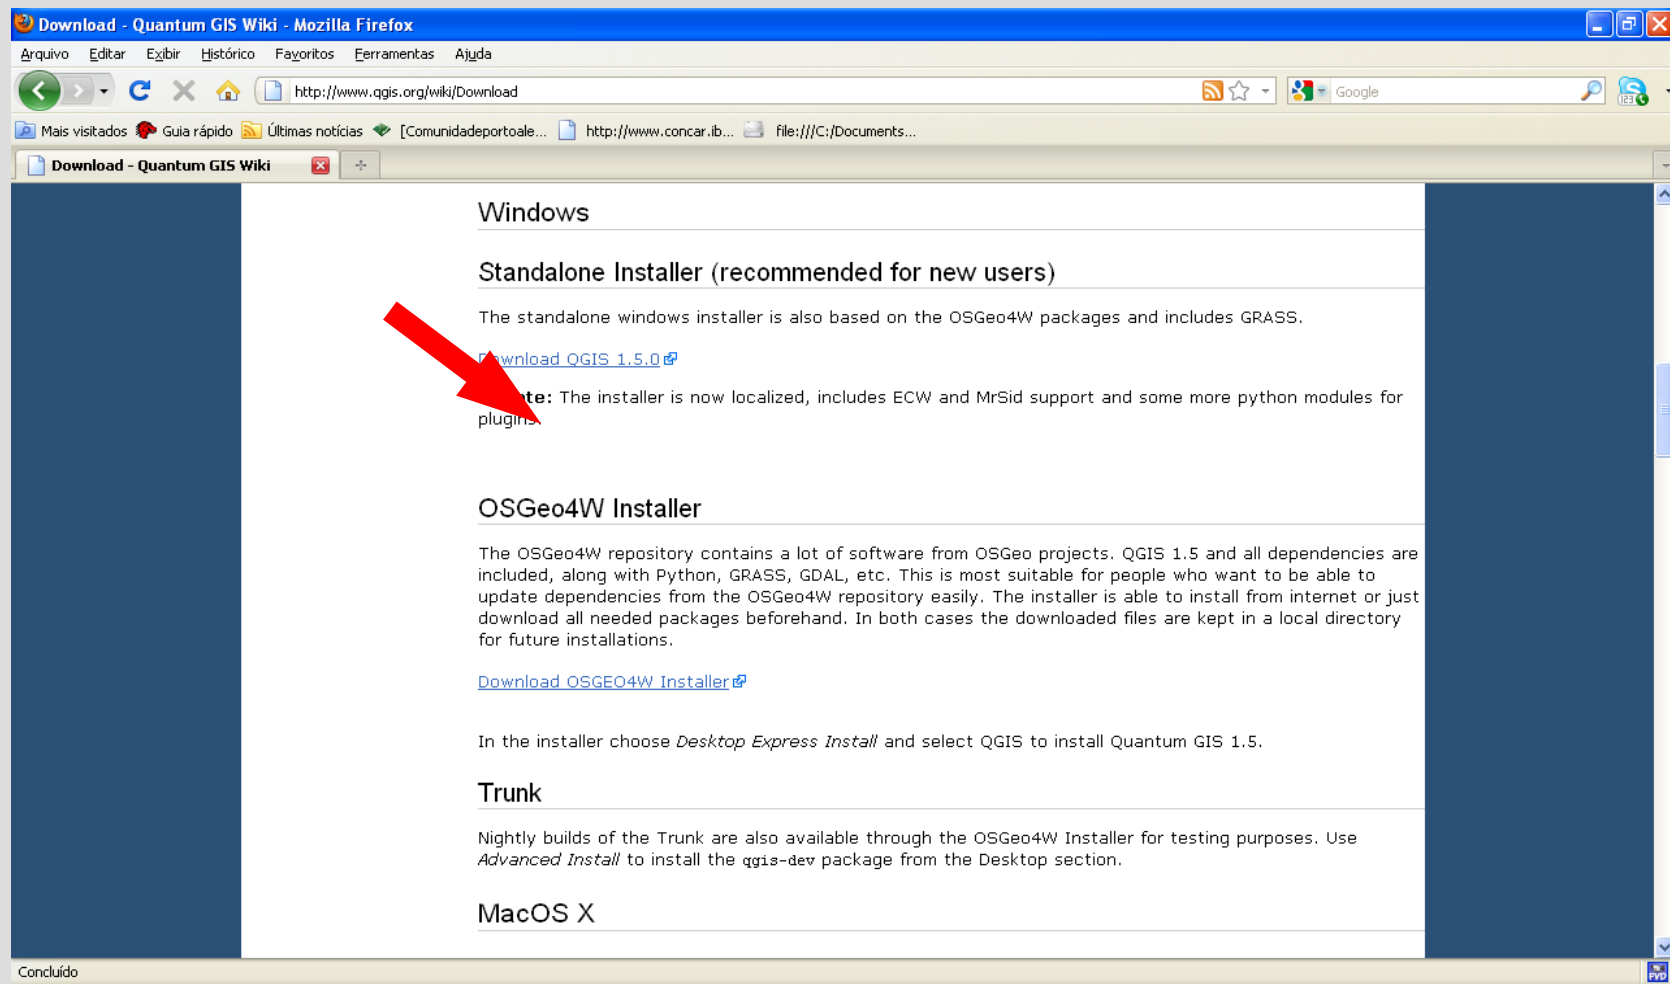

Download do Instalador a partir de <http://www.qgis.org>

The screenshot shows a Mozilla Firefox browser window displaying the Quantum GIS website. The browser's address bar shows the URL <http://www.qgis.org/>. The website header features the Quantum GIS logo, a search bar, and flags for various languages. A navigation menu includes links for Wiki, Blog, Forum, Bugs, Shop, and Download. A red arrow points to the 'Download' link. Below the navigation menu, the main content area features a large banner for 'Quantum GIS Version 1.5.0 "Tethys"'. To the left of the banner is a 'Main Menu' section with links to Home, About QGIS, Community, Documentation, Download, Commercial Support, Developer Meetings, User Meetings, Sponsorship, and Advanced Search. Below the main menu is a 'Support QGIS!' section with a 'Make A Donation' button. The browser's status bar at the bottom indicates 'Concluído'.

Download do Instalador

- Selecione o link *Standalone installer*.

The screenshot shows a Mozilla Firefox browser window displaying the Quantum GIS Wiki page for downloading the installer. The browser's address bar shows the URL <http://www.qgis.org/wiki/Download>. The page content is organized into sections:

- Windows**
 - Standalone Installer (recommended for new users)**

The standalone windows installer is also based on the OSGeo4W packages and includes GRASS.

[Download QGIS 1.5.0](#)

Note: The installer is now localized, includes ECW and MrSid support and some more python modules for plugins.
 - OSGeo4W Installer**

The OSGeo4W repository contains a lot of software from OSGeo projects. QGIS 1.5 and all dependencies are included, along with Python, GRASS, GDAL, etc. This is most suitable for people who want to be able to update dependencies from the OSGeo4W repository easily. The installer is able to install from internet or just download all needed packages beforehand. In both cases the downloaded files are kept in a local directory for future installations.

[Download OSGEO4W Installer](#)

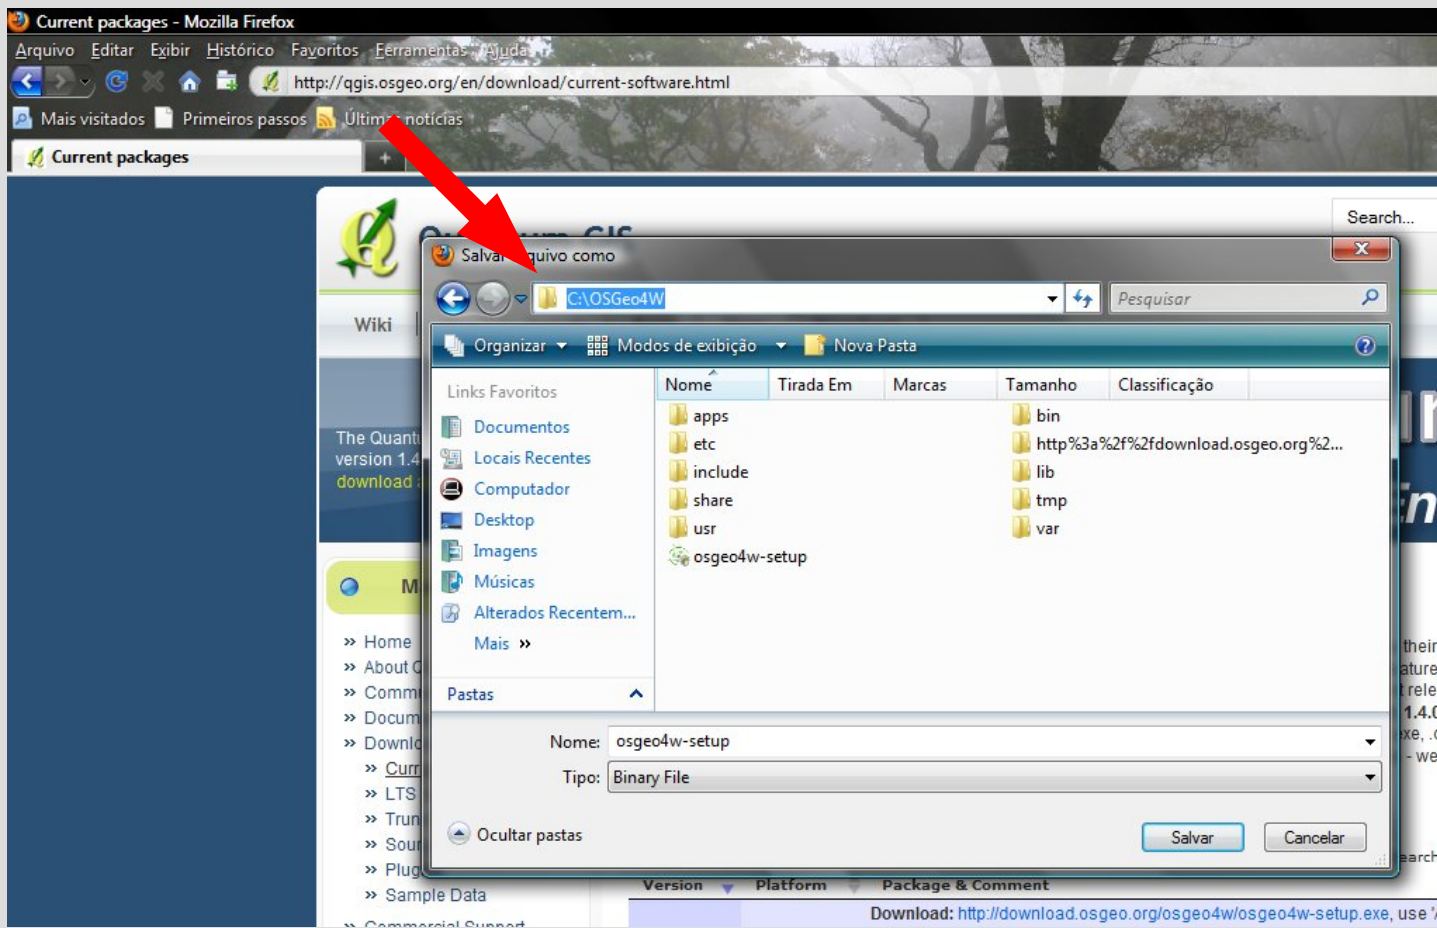

In the installer choose *Desktop Express Install* and select QGIS to install Quantum GIS 1.5.
 - Trunk**

Nightly builds of the Trunk are also available through the OSGeo4W Installer for testing purposes. Use *Advanced Install* to install the `qgis-dev` package from the Desktop section.
 - MacOS X**

The status bar at the bottom of the browser window shows the word "Concluido" (Completed).

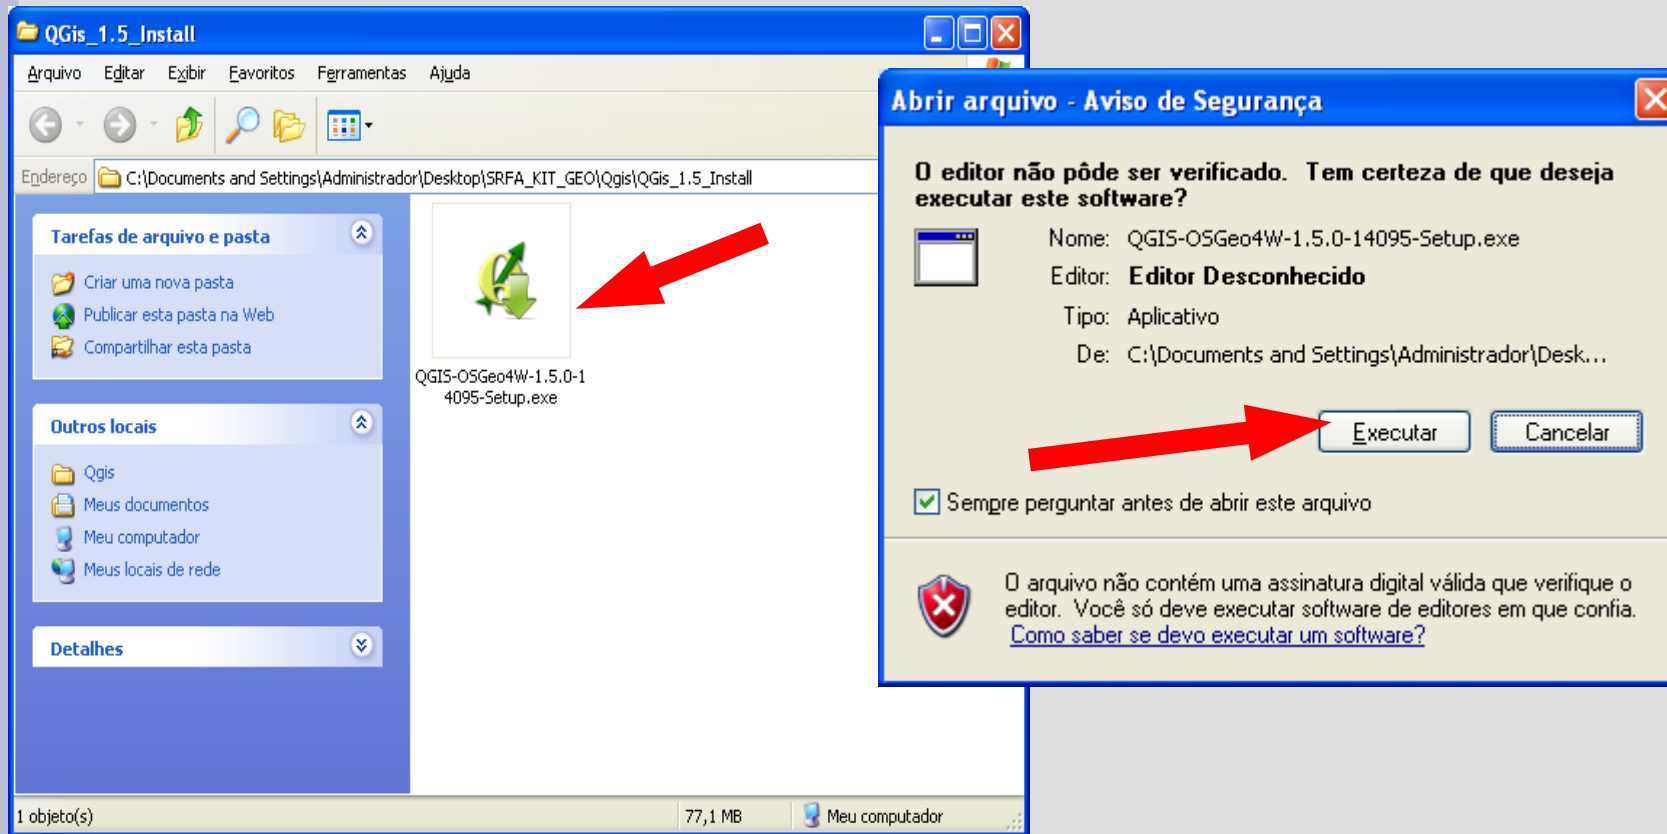

Download do Instalador

- Crie uma pasta e salve o instalador nela.

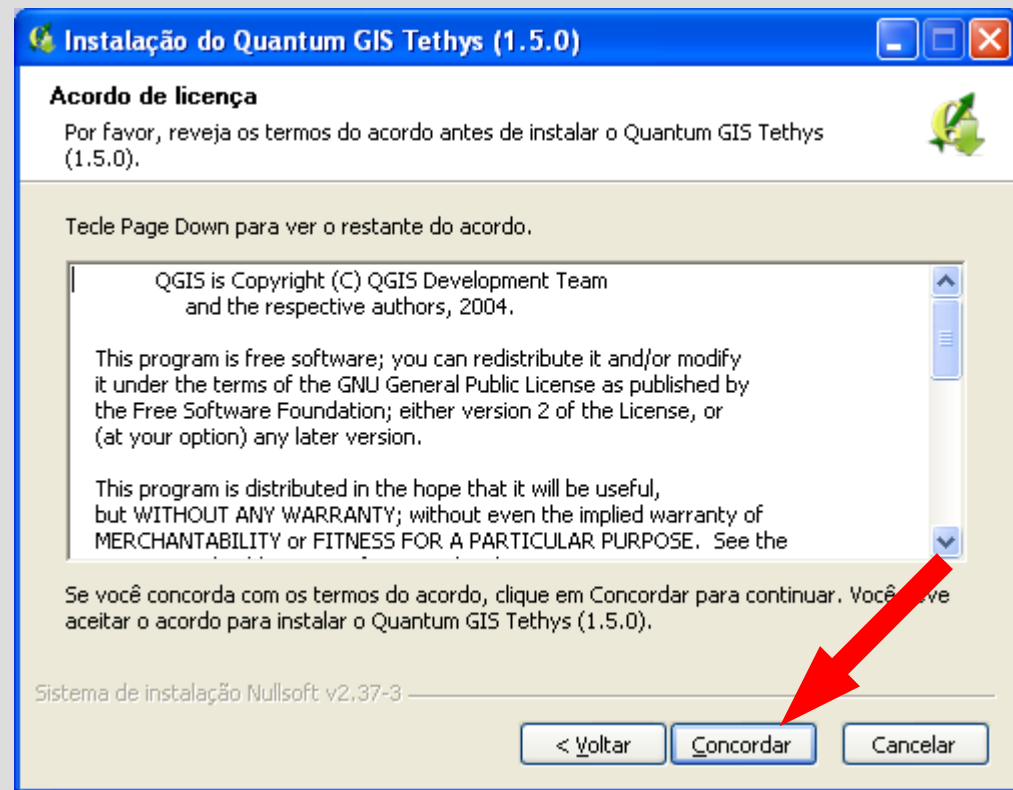

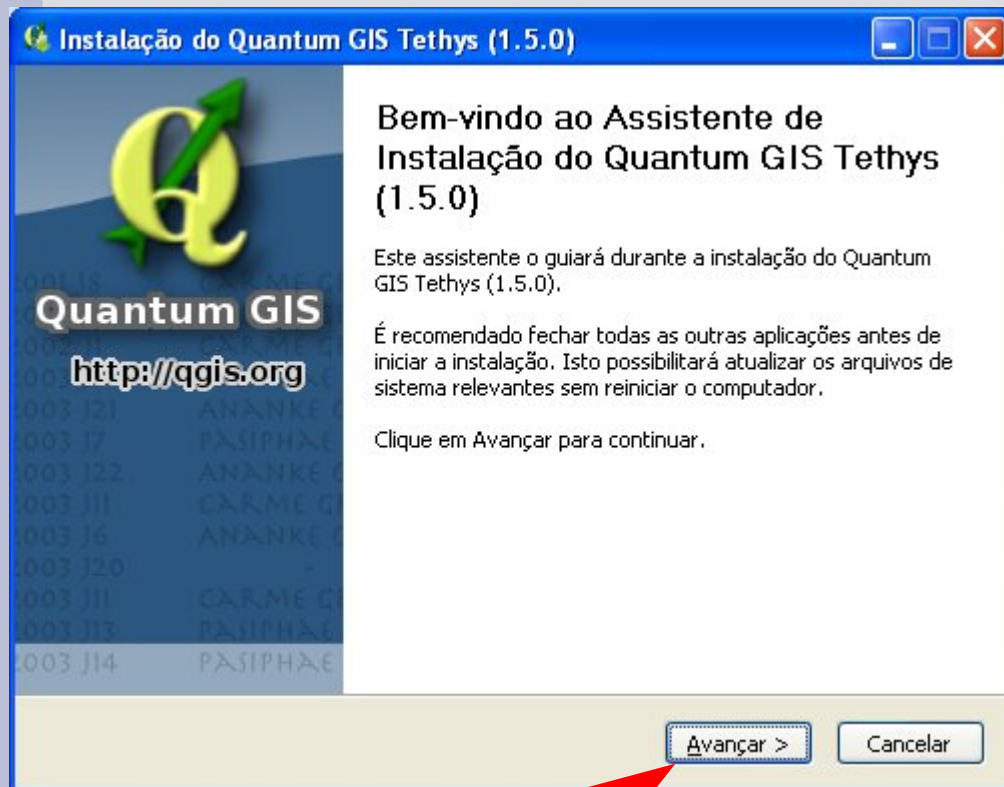

Execução do Instalador

- Execute o instalador e avance.

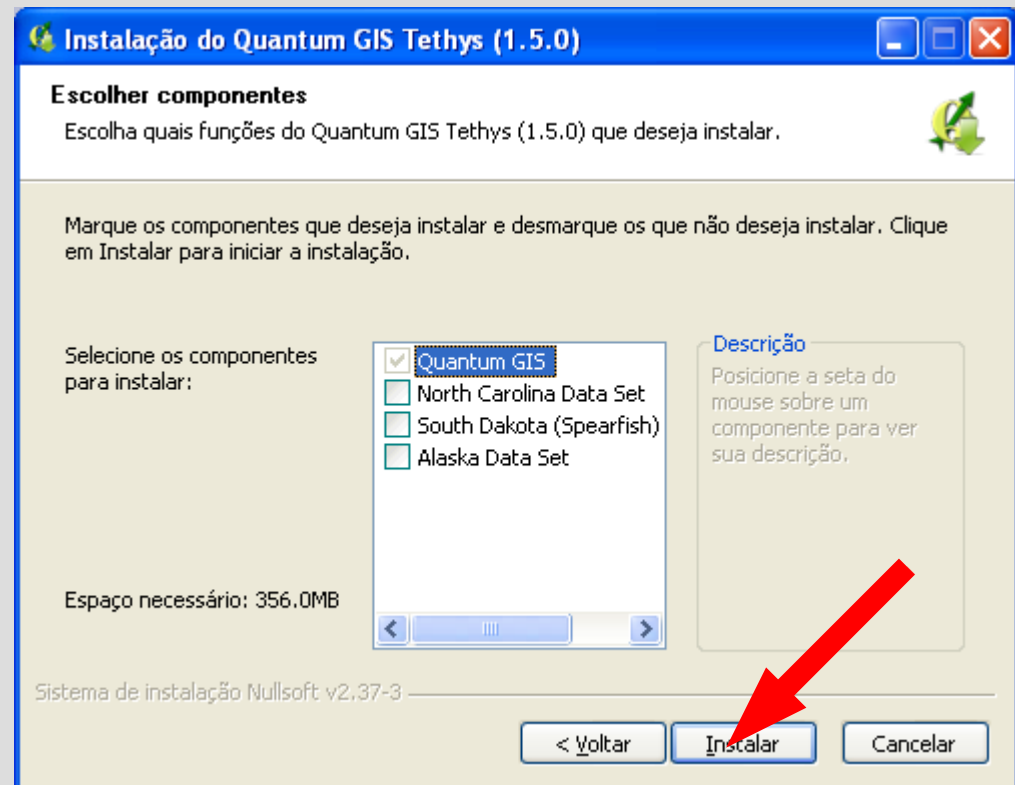

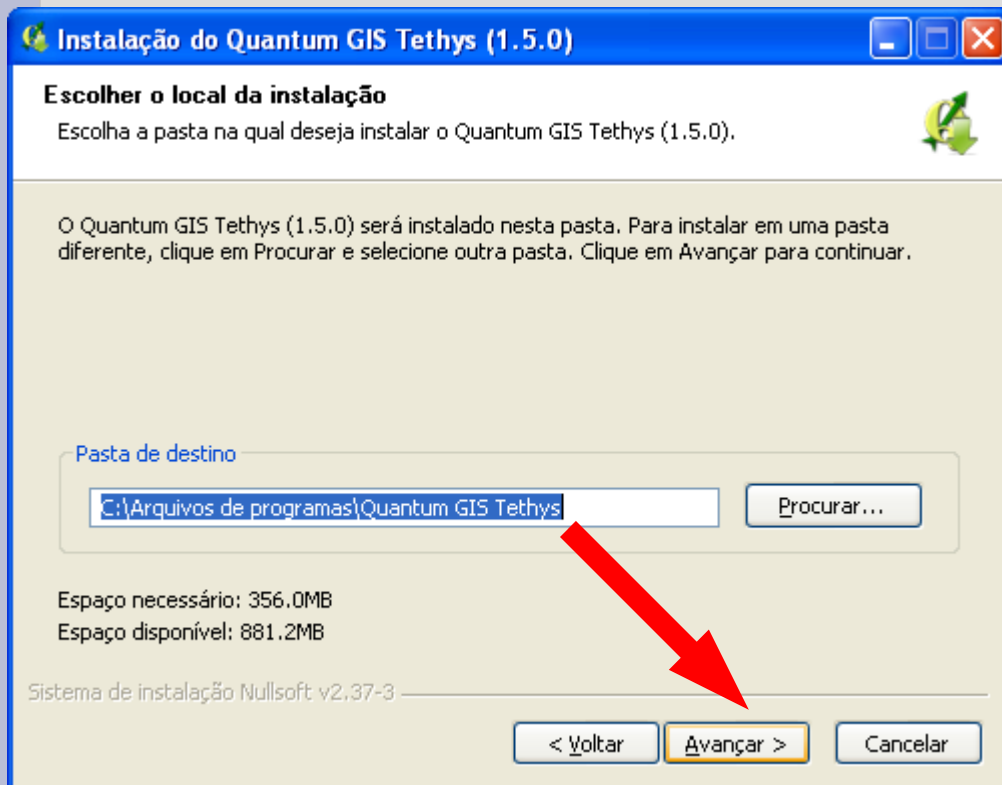

Execução do Instalador

- O assistente irá guiar a instalação.

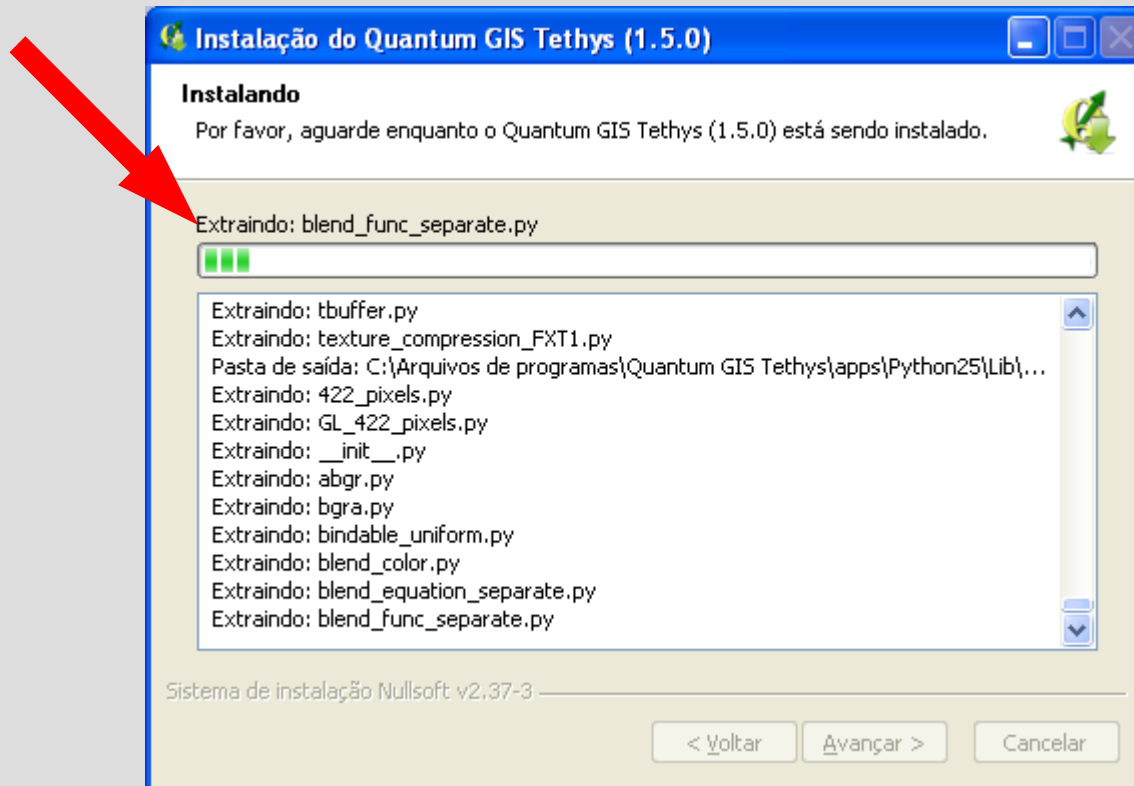

Execução do Instalador
